

15A Power Inlet + RCBO Box

Key Improvements

The RCD Box is designed to provide a reliable and efficient solution for electrical protection. Our latest improvement enhances durability, ease of installation and waterproofing capabilities.

Enhanced Corner Screw Holes with Copper Nuts

- Four screw corners of the box have been reinforced with copper nuts to prevent damage during installation and removal, ensuring the integrity of the box over time.
- Provide four stainless steel screws, which are designed for easy installation and ensure a secure fit.

Optimised Bottom Ports for Improved Waterproofing.

*Adjustments have been made to the three bottom ports of the box to enhance waterproof protection.

The cable gland port has been enlarged to 25mm, accommodates a wider range of cable sizes, facilitating more versatile installations while maintaining waterproof performance.

Two additional ports are fully sealed, offers superior waterproofing, protecting internal components from moisture and environmental factors, thereby extending the lifespan of the product.

RCBO Models

Offering options for both Tesla and NHP RCBOs, allows users flexibility in selecting the best option that fits their specific needs and preferences
